The Cisco® Connected Real Estate portfolio has been created to provide the real estate industry's next-generation building solutions. These solutions add value to developers and owners by changing the way buildings are designed, built, managed, and occupied. The solutions integrate communications, security, and building systems onto one IP network, creating significant financial and operational advantages. A network that is integrated into the fabric of the building provides owners and tenants with greater control and security of the building's operations, while delivering new building services.

To learn more about Cisco Connected Real Estate solutions, please e-mail us at ccre_info@external.cisco.com or visit www.cisco.com/go/RealEstate

welcome to the human network. CISCO.
