Person A: owns a $100,000 home that had a $40,000 mortgage against it. They also have $30,000 in other financial and vehicular assets.

Under current statute the value of the estate would be (disregarding the mortgage) $130k

$362.50 + 0.00125 over 100k

37.5 **$400.00**

The difference is $62.50 or about 15% drop in the fees

Under the change, the value of the estate drops to $90,0000

237.5 + 0.0025 40000 100 **$ 337.50** $62.50 0.15625

Person B: owns a $200,000 home that had a $40,000 mortgage against it. They also have $50,000 in other vehicular assets.

Current statute value: $250k

362.5 + 0.00125 150000 187.5 **$ 550.00**

Under the proposed change, value drops to $210k

Difference is $50, or about a 9% drop in fees

362.5 + 0.00125 110000 137.5 **$ 500.00**

Person C: owns a $50,000 home that had a $40,000 mortgage against it. They also have $10,000 in non-home assets.

Current estate value: $60k

237.5 + 0.0025 20000 50 **$ 287.50**

In this case the fees paid would drop by 59%

Proposed statue value: $20k

$ 168.75 0.586957

68.75 + 0.005 10000 50 **118.75**

Person D: owns $100k home, $40k mortgage, and no other assets

Under current = $362.50

Under proposed: $60k =

Difference: 100 0.275862 **27% drop in fees**

237.5 0.0025 10000 25 262.5
