February 25, 2010

This e-mail is to urge you to to keep the composting sites in Michigan open and not allow grass clippings and yard waste to be dumped in landfills. (HR4265 and HR4286)

My son has a small yard care business and utilizes compost in landscaping. He uses composting sites to get rid of yard waste. This could put him out of business, not to mention how many other businesses this will shut down and how many employees will be out of jobs and on unemployment.

At a time when Michigan is struggling and unemployment is so high I don't think that any bills should be passed that would add to the loss of jobs. Especially these which make no sense.
