Subject: HB 4265 & HB 4266

Dear Clerk Petroskey,

Please accept my comments against HB 4265 & HB 4266. These bills will put more waste into landfills, and devastate a thriving Michigan business, namely composting businesses. These businesses serve a unique and useful purpose of recycling yard waste. The waste is made into a useable and important product. What a disgrace and discredit it would be to the citizens of Michigan (at least those who are attempting to go green) to send yard waste to landfills.

Thank you for hearing my comments.
