Michigan elected officials who benefit from changes in electoral college have no business changing it. House Bill 5974 would rig Michigan elections at the expense of the people. The bill not only presents a grave danger to our democratic process, but threatens to make Michigan irrelevant in presidential elections, reducing our state's influence on the national political stage and undermining our ability to attract attention to our state's unique issues like the auto industry and the Great Lakes.

Dear Michigan House Legislators. Your current plan to introduce HB 5974 seems to me very short-sighted and a direct assault on election processes which could have serious repercussions. It would be easy to make the assumption that along with voter suppression legislation, this is just one more effort to suppress citizen interest in a state where you and many others have been elected with much less than any kind of majority. I don't know about you, but one party rule in any other place in the world would be called something other than democracy. Please withdraw this legislation, which is a bad idea and deepens mistrust in our public institutions.

For years the Republicans have worked to "take away" what they claim they "live by" - the Constitution -- so apparently, they feel it was only designed for white males and a few white females if they agree with the males. Limitation is their creed and the world will no longer exist for others for apparently these people prefer slavery for all but the wealthy. They prefer poverty for everyone but themselves.....what happens to the taxes we all pay into? It would seem the Republicans want to use that for themselves personally time and time again. We need Real Republicans and not "Tea partiers" -- (they seem to be stuck in the 1800's politically)
