RE: HB5908

Dear Honorable Committee Members,

As the owner of VB Transportation Service LLC, regulated under the State Limousine Act 271, I would like to register with the Committee that I am against HB5908.

Maintaining regulation of 1-8 passenger vehicles at the State level and allowing the largest markets in the State the ability to regulate locally is the most effective way to maintain a viable transportation industry in the State.

Deregulating at the State level and pushing the regulation locally will bury the transportation providers in a red tape. The providers will spend more time trying to maintain legal operating status in every Township, Village and City than proving transportation services.

Again, maintaining the regulation at the State level and allowing the State's largest markets to regulate locally will far better service the bulk of the transportation riding population.

Kind Regards,

Matthew Oddy
President
VB Sedan
