

Hi my name is Terry Spurlock,

I had NHL I was treated from April of 08 to July of 2013 my treatment of C.H.O.P. R for 6 months and after care should of only been for 2 years MAX.

Only after the arrest of fata I found out different 2 years not 5 Years but I would still be there if not for the arrest of Fata he told me this would be once a month for the rest of my life. I am only talking about what happened to me after the 2 year Mark but first to be fair to Fata he did Save my life with the right treatment for my first 2 years (maybe).

Now years 3,4, and 5. He told me that it's life time treatment. Once a month for 36 months Intel his arrest I received eather ruxtion, gamma guard or octagam and iron treatments. This over treatment I really and truly believe have messed up my body my upper chest breathing I get sick real easy colds, flu and a number of pneumonia cases I have had .

Blood clots that all most killed me to. Over treatment side effects. From all these drugs . I personally have lost everything My health, job supervisor at MGM GRAND CASINO car'S 60 impala 348 tri-power my wife's car and my home in Clarkston and all respect for myself for letting this happen to me.

I really believe fata would have killed me in the long run with his drugs and countless Dr, hospitals visits I had .

Will today 2014 I live in holly in a Mobil home its nice not a home in Clarkston tho still get sick pneumonia and I'm on SS/D I can't hold down a job because of colds ,flu's pneumonia keeps coming back then im sick for a while sometimes for weeks.

I have changed everything in my life to make it better the only thing I have is a really hard time with is. FATA I did nothing to him and HE WAS PAYING HIMSELF TO KILL ME WITH HIS TREATMENT.

I have to say this I was sober for 25years when fata said to me this is life long treatment I started to drink again and by the time of fata arrest I could not stop but when my treatment stopped I went to rehabilitation it has been over 11 months now clean and sober. New doctors, Home, cars, health ok Intel I get sick

And for all I lost (it's not my fault).
