Subject: SB 444

Ms. Brewer,

I wish to register a collective voice of support for SB 444. Three years ago, Senator Casperson attended a meeting with the board and principal officers of the Invasive Species Control Coalition of Watersmeet and representatives of area Lake Associations to discuss the need for changes in Treatment permitting and associated problems encountered in the fight against AIS. I believe that may have been the genesis of SB 444. The Senator has worked diligently to draft what is now the final Bill. He has communicated carefully with stakeholders during the process of drafts and revisions.

I think the Bill will serve our state well in streamlining permitting as well as providing many other enhancements to those of us that often found ourselves mired in bureaucratic red tape in an effort to upgrade a permit or simply get a permit issued in a timely fashion. On behalf of over 400 members of the Cisco Chain Riparian Owners Association, I support the Bill.

Greg Wenzel
