To Whom It May Concern:

RE: VALERIO, Linda

I am writing on behalf of Ms. Linda Valerio, as her treating neurologist and physician. Ms. Valerio suffers from numerous medical conditions including hypothyroidism, polyneuropathy, and heart palpitations. There is a deep rooted concern about the possible installation of a smart meter at her house. This technology has not been proven to be completely safe to be around humans and there is concern that it may worsen or affect her medical condition. I would request that a smart meter not be installed at her house for these reasons and that the continuation of an analog meter be used.

Thank you very much for your consideration in this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Matthew C. Holtzman", is written over the word "Sincerely,".
