To Whom It May Concern,

Ms. Tanda Archer has been a patient of the Center for Occupational and Environmental Medicine since February 2010, for chemical and food sensitivity, nutritional deficiency, malabsorption and chronic fatigue. Ms. Archer has been experiencing a spreading phenomenon with additional health concerns including, but not limited to, electromagnetic sensitivity, improved but continued shingles, candida flare ups, weight loss, and pain. Electromagnetic exposures may exacerbate her multi-system and organ dysfunction.

It is imperative that Ms. Archer maintain the safety of her home environment given the degree of her illness, as she is house bound due to the severity of her chemical sensitivity. A smart meter or opt out meter attached to her home would cause Ms. Archer undue health issues that can be avoided with the use of an analog meter.

I appreciate your cooperation and assistance in this matter. Should you have any questions feel free to call my office at (843) 572-1600.

Sincerely,

William Weirs, MD, FACEP
