

SENATE BILL No. 540

September 24, 2013, Introduced by Senator NOFS and referred to the Committee on Energy and Technology.

A bill to enhance public safety, protect the environment, and prevent the disruption of vital public services by reducing the incidences of damage to underground facilities caused by excavation or blasting activity by providing notices to facility owners and facility operators before excavation or blasting; to provide for certain notices to affected parties when underground facilities are damaged; to provide for the powers and duties of certain state governmental officers and entities; to allow the promulgation of rules; to prescribe penalties; to allow the imposition of a fee; to provide for immunity for certain individuals; to allow claims for damages against certain governmental entities in certain circumstances; and to repeal acts and parts of acts.

THE PEOPLE OF THE STATE OF MICHIGAN ENACT:

1 Sec. 1. This act shall be known and may be cited as the "MISS

1 DIG underground facility damage prevention and safety act".

2 Sec. 3. As used in this act:

3 (a) "Additional assistance" means a response by a facility
4 owner or facility operator to a request made by an excavator during
5 business hours, for help in locating a facility.

6 (b) "Approximate location" means a strip of land at least 36
7 inches wide, but not wider than the width of the marked facility
8 plus 18 inches on either side of the facility marks.

9 (c) "Blasting" means changing the level or grade of land or
10 rendering, tearing, demolishing, moving, or removing earth, rock,
11 buildings, structures, or other masses or materials by seismic
12 blasting or the detonation of dynamite or any other explosive
13 agent.

14 (d) "Business day" means Monday through Friday, excluding
15 holidays observed by the notification system and posted on the
16 notification system website.

17 (e) "Business hours" means from 7 a.m. to 5 p.m., eastern
18 standard time, on business days.

19 (f) "Caution zone" means the area within 48 inches of either
20 side of the facility marks provided by a facility owner or facility
21 operator.

22 (g) "Commission" means the Michigan public service commission
23 created in section 1 of 1939 PA 3, MCL 460.1.

24 (h) "Damage" means any impact upon or exposure of an
25 underground facility requiring its repair or replacement due to
26 weakening, partial destruction, or complete destruction of the
27 facility, including, but not limited to, the protective coating,

1 lateral support, cathodic protection, or housing of the facility.

2 (i) "Design ticket" means a communication to the notification
3 system in which a request for information regarding underground
4 facilities for predesign, design, or advance planning purposes, but
5 not marking for excavation or blasting, is made under the
6 procedures described in section 6a.

7 (j) "Dig notice" means a communication to the notification
8 system by an excavator providing notice of intended excavation or
9 blasting activity as required by this act.

10 (k) "Emergency" means a sudden or unforeseen occurrence,
11 including a government-declared emergency, involving a clear and
12 imminent danger to life, health, or property, or imminent danger to
13 the environment, that requires immediate correction in order to
14 restore or to prevent the interruption of essential governmental
15 services, utility services, or the blockage of public
16 transportation and that requires immediate excavation or blasting.

17 (l) "Emergency notice" means a communication to the
18 notification system to alert the facility owners or facility
19 operators of the urgent need for marking the location of a facility
20 due to an emergency.

21 (m) "Excavation" means, other than surface maintenance,
22 moving, removing, or otherwise displacing earth, rock, or other
23 material below existing surface grade with power tools or power
24 equipment, including, but not limited to, grading, trenching,
25 tiling, digging, drilling, boring, augering, tunneling, scraping,
26 cable or pipe plowing, and pile driving; and wrecking, razing,
27 rending, moving, or removing a structure or mass of materials.

1 Excavation does not include any of the following:

2 (i) Any of the following activities performed in the course of
3 farming operations:

4 (A) Any farming operation performed in the public right-of-way
5 to a depth of not more than 12 inches below the existing surface
6 grade if the farming operation is not performed within 6 feet of
7 any aboveground structure that is part of a facility.

8 (B) Any farming operation performed outside a public right-of-
9 way and within 25 yards of an existing petroleum or natural gas
10 pipeline to a depth of not more than 18 inches below the existing
11 surface grade if the farming operation is not performed within 6
12 feet of any aboveground structure that is part of a facility.

13 (C) Any farming operation performed outside a public right-of-
14 way and not within 25 yards of an existing petroleum or natural gas
15 pipeline if the farming operation is not performed within 6 feet of
16 any aboveground structure that is part of a facility.

17 (ii) Replacing a fence post, sign post, or guardrail in its
18 existing location.

19 (iii) Any excavation performed at a grave site in a cemetery.

20 (iv) Any excavation performed within an active or retired cell
21 at a solid waste disposal site that has planned for underground
22 facilities.

23 (n) "Excavator" means any person performing excavation or
24 blasting.

25 (o) "Facility" or "underground facility" means an underground
26 or submerged conductor, pipe, or structure, including, but not
27 limited to, a conduit, duct, line, pipe, wire, or other device and

1 its appurtenances used to produce, store, transmit, or distribute a
2 utility service, including communications, data, cable television,
3 electricity, heat, natural or manufactured gas, oil, petroleum
4 products, steam, sewage, video, water, and other similar
5 substances, including environmental contaminants or hazardous
6 waste.

7 (p) "Facility operator" means a person that controls the
8 operation of a facility.

9 (q) "Facility owner" means a person that owns a facility.

10 (r) "Farm" means that term as defined in section 2 of the
11 Michigan right to farm act, 1981 PA 93, MCL 286.472.

12 (s) "Farming operations" means plowing, cultivating, planting,
13 harvesting, and similar operations routine to most farms. Farming
14 operations do not include installation of drainage tile,
15 underground irrigation lines, or the drilling of a well.

16 (t) "Governmental agency" means the state and its political
17 subdivisions, including counties, townships, cities, villages, or
18 any other governmental entity.

19 (u) "Mark", "marks", or "marking" means the temporary
20 identification on the surface grade of the location of a facility
21 in response to a ticket as described in section 7.

22 (v) "Notification system" means MISS DIG System, Inc., a
23 Michigan nonprofit corporation formed and operated by each facility
24 owner and facility operator to administer a 1-call system for the
25 location of facilities, or any successor to this corporation.

26 (w) "Person" means an individual, firm, joint venture,
27 partnership, corporation, association, governmental agency,

1 department or agency, utility cooperative, or joint stock
2 association, including any trustee, receiver, assignee, or personal
3 representative thereof.

4 (x) "Positive response" means the procedure administered by
5 the notification system to allow excavators to determine whether
6 all facility owners or facility operators contacted under a ticket
7 have responded in accordance with this act.

8 (y) "Public right-of-way" means the area on, below, or above a
9 public roadway, highway, street, alley, easement, or waterway.

10 (z) "Safe zone" means an area 48 inches or more from either
11 side of the facility marks provided by a facility owner or facility
12 operator.

13 (aa) "Soft excavation" means a method and technique designed
14 to prevent contact damage to underground facilities, including, but
15 not limited to, hand-digging, cautious digging with nonmechanical
16 tools, vacuum excavation methods, or use of pneumatic hand tools.

17 (bb) "Start date" means the date that a proposed excavation or
18 blasting is expected to begin as indicated on a ticket.

19 (cc) "Surface maintenance" means the repairing or patching of
20 road potholes and cracks, reshaping a road surface, graveling and
21 repositioning loose stone, railroad rail and tie replacement, road
22 milling and resurfacing that does not extend below the original
23 road base, and reshaping and repair of the railroad grade. Surface
24 maintenance does not include any work below the depth of the
25 existing road surface material or 12 inches, whichever is less.

26 (dd) "Ticket" means a communication from the notification
27 system to a facility owner or facility operator requesting the

1 marking of underground facilities, based on information provided by
2 an excavator in a dig notice.

3 (ee) "White lining" means marking by an excavator of the area
4 of a proposed excavation or blasting, with white paint or flags, or
5 both, before giving notice to the notification system.

6 Sec. 4. (1) Facility owners and facility operators shall
7 continue to operate and be members of MISS DIG Systems, Inc., a
8 Michigan nonprofit corporation, that shall have the duties and
9 undertake the responsibilities of the notification system under
10 this act on and after the effective date of this act. The
11 notification system responsibilities and duties do not include the
12 physical marking of facilities, which is the responsibility of a
13 facility owner or facility operator upon notification under this
14 act.

15 (2) The notification system and its procedures shall be
16 governed by its board of directors and in accordance with its
17 current articles of incorporation and bylaws as of the effective
18 date of this act, with any future changes made in accordance with
19 the nonprofit corporation act, 1982 PA 162, MCL 450.2101 to
20 450.3192, and the notification system's articles, bylaws, and board
21 procedures. The notification system shall request input regarding
22 its policies from all interested persons, including facility owners
23 and facility operators, excavators, marking service providers, and
24 governmental agencies.

25 (3) Funding for the notification system operations shall be
26 established by the notification system, including through fees
27 based on a reasonable assessment of operating costs among facility

1 owners or facility operators. A facility owner or facility operator
2 shall not charge a fee to excavators for marking facilities under
3 this act.

4 (4) Facility owners and facility operators shall be members of
5 and participate in the notification system and pay the fees levied
6 by the notification system under this section. This obligation and
7 the requirements of this act for facility owners and facility
8 operators do not apply to persons owning or operating a facility
9 located on real property the person owns or occupies if the
10 facility is operated solely for the benefit of that person.

11 (5) Owners of real property on which there is a farm
12 operation, as that term is defined in section 2 of the Michigan
13 right to farm act, 1981 PA 93, MCL 286.472, may become a nonvoting
14 member of the notification system, known as a farm member, upon
15 providing the notification system with the information necessary to
16 send the farm member a ticket for purposes of notification under
17 section 6(1). A farm member is not subject to any fees levied under
18 subsection (3).

19 (6) The notification system is exempt from taxes collected
20 under the general property tax act, 1893 PA 206, MCL 211.1 to
21 211.155.

22 Sec. 5. (1) An excavator shall provide a dig notice to the
23 notification system at least 72 hours, but not more than 14
24 calendar days, before the start of any blasting or excavation. If
25 the dig notice is given during business hours, the 72-hour period
26 shall be measured from the time the dig notice is made to the
27 notification system. If a dig notice is given before 7 a.m. on a

1 business day, the 72-hour period begins at 7 a.m. on that day. If a
2 dig notice is given on a nonbusiness day or after 5 p.m. on a
3 business day, the 72-hour period begins at 7 a.m. on the next
4 business day. All hours of nonbusiness days are excluded in
5 counting the 72-hour period. If there are multiple excavators on
6 the same site, each excavator shall provide its own dig notice.

7 (2) A dig notice shall contain at least all of the following:

8 (a) The name, address, and telephone number of the excavator.

9 (b) A description of the proposed area of blasting or
10 excavation, including the street address and a property
11 description.

12 (c) The specific type of work to be performed.

13 (d) The start date and time of blasting or excavation.

14 (e) Whether the proposed blasting or excavation will be
15 completed within 21 days after the start date.

16 (3) A ticket is valid for 21 days from the start date of the
17 excavation or blasting on the ticket as identified by the
18 excavator, except that a ticket is valid for 180 days from the
19 start date if the dig notice indicates that the proposed excavation
20 or blasting will not be completed within 21 days from the start
21 date.

22 (4) An excavator shall comply with the notification system
23 procedures and all requirements of this act.

24 (5) Except as otherwise provided in this subsection, before
25 blasting or excavating in a caution zone, an excavator shall expose
26 all marked facilities in the caution zone by soft excavation. If
27 conditions make complete exposure of the facility impractical, an

1 excavator shall consult with the facility owner or facility
2 operator to reach agreement on how to protect the facility. For
3 excavations in a caution zone parallel to a facility, an excavator
4 shall use soft excavation at intervals as often as reasonably
5 necessary to establish the precise location of the facility. An
6 excavator may use power tools and power equipment in a caution zone
7 only after the facilities are exposed or the precise location of
8 the facilities is established.

9 (6) An excavator shall provide support or bracing of
10 facilities or excavation walls in an excavation or blasting area
11 that are reasonably necessary for protection of the facilities.

12 (7) An excavator shall provide notification to the
13 notification system if facility markings are destroyed or covered
14 by excavation or blasting activities or if a ticket expires before
15 the commencement of excavation. If a ticket expires before the
16 commencement of excavation, an excavator shall provide a new dig
17 notice to the notification system, and comply with subsection (1).

18 (8) An excavator shall provide notification to the
19 notification system requesting additional assistance if the
20 location of a marked facility within the approximate location
21 cannot be determined.

22 (9) An excavator shall provide immediate additional notice to
23 the notification system and stop excavation in the immediate
24 vicinity if the excavator has reason to suspect the presence of an
25 unmarked facility due to any 1 of the following:

26 (a) Visible evidence of a facility with no marks visible.

27 (b) Lack of a positive response to a ticket.

1 (c) A positive response from a facility owner or facility
2 operator indicating the presence of a facility with no marks
3 visible.

4 (10) If an excavator contacts or damages a facility, the
5 excavator shall provide immediate notice to the facility owner or
6 facility operator.

7 (11) If an excavator damages a facility resulting in the
8 escape of any flammable, toxic, or corrosive gas or liquid, or
9 endangering life, health, or property, the excavator shall call 9-
10 1-1 and provide immediate notice to the facility owner or facility
11 operator. The excavator shall also take reasonable measures to
12 protect the excavator, those in immediate danger, the general
13 public, and the environment until the facility owner or facility
14 operator, or emergency first responders, have arrived and taken
15 control of the site.

16 (12) An excavator shall provide prompt emergency notice to the
17 notification system for any proposed excavation or blasting in an
18 emergency. In an emergency, blasting or excavation required to
19 address the conditions of the emergency may be performed as the
20 emergency conditions reasonably require, subject to the provisions
21 in this act for emergency notice and marking facilities in response
22 to an emergency notice.

23 (13) If the location of a proposed excavation or blasting
24 cannot be described in a manner sufficient to enable the facility
25 owner or facility operator to ascertain the precise tract or parcel
26 involved, an excavator shall provide white lining in advance of
27 submitting a ticket or additional assistance to the facility owner

1 or facility operator on reasonable request to identify the area of
2 the proposed excavation or blasting.

3 (14) For purposes of this section, notice to the notification
4 system constitutes notice to all facility owners or facility
5 operators regarding facilities located in the area of the proposed
6 excavation or blasting.

7 (15) Except as otherwise provided in this act, an excavator
8 may conduct excavation in a safe zone using power equipment without
9 establishing the precise location of any facilities.

10 Sec. 6. (1) The notification system shall receive dig notice
11 notification of proposed excavation and blasting activities and
12 promptly transmit a ticket to facility owners or facility operators
13 of facilities in the area of the proposed excavation or blasting.
14 The notification system shall provide alternative means of access
15 and notification to the system. Except for shutdowns caused by acts
16 of nature, war, or terrorism, the notification system shall be
17 available 24 hours per day, 7 days per week.

18 (2) The notification system shall publicize the availability
19 and use of the notification system and educate the public,
20 governmental agencies, excavators, farm operators, facility owners,
21 and facility operators regarding the practices and procedures of
22 the notification system, the requirements of this act, and
23 practices to protect underground facilities from damage.

24 (3) The notification system shall administer a positive
25 response system to allow excavators to determine whether all of the
26 facility owners or facility operators in the area have responded to
27 a ticket and whether a particular facility owner or facility

1 operator does not have facilities in the area of a proposed
2 excavation or blasting.

3 (4) The notification system shall maintain adequate records of
4 its notification activity for a period of 6 years after the date of
5 the notice, including voice recordings of calls. The notification
6 system shall provide copies of those records to any interested
7 person upon written request and payment of a reasonable charge for
8 reproduction and handling as determined by the notification system.

9 (5) The notification system shall expedite the processing of
10 any emergency notice it receives under this act.

11 (6) The notification system shall receive design tickets under
12 the procedures described in section 6a and transmit them to
13 facility owners or facility operators.

14 Sec. 6a. (1) The notification system shall establish
15 reasonable procedures, including marking response times, for design
16 ticket notification to facility owners or facility operators of
17 requests for project design or planning services to determine the
18 type, size, and general location of facilities during the planning
19 and design stage of a construction or demolition project. Facility
20 owners or operators may charge the person requesting project design
21 or planning services separate fees for design or planning services.

22 (2) Procedures under this section do not affect or alter the
23 obligation of excavators to provide notice of blasting or
24 excavation under section 5.

25 (3) The response to a design ticket is to provide general
26 information regarding the location of underground facilities, not
27 to mark any facilities. However, if a facility owner or operator

1 does not have drawings or records that show the location of a
2 facility, the facility owner or operator shall mark that facility
3 under the procedures described in section 7. A design ticket or
4 information provided in response to a design ticket does not
5 satisfy the requirement under this act for excavation or blasting
6 notice to the notification system or marking the approximate
7 location of facilities for blasting or excavation.

8 Sec. 7. (1) A facility owner or facility operator shall
9 respond to a ticket by the start date and time for the excavation
10 or blasting under section 5(1) by marking its facilities in the
11 area of the proposed excavation or blasting in a manner that
12 permits the excavator to employ soft excavation to establish the
13 precise location of the facilities.

14 (2) A facility owner or facility operator shall mark the
15 location of each facility with paint, stakes, flags, or other
16 customary methods using the uniform color code of the American
17 national standards institute as follows:

18 (a) White - used by excavators to mark a proposed excavation
19 or blasting area.

20 (b) Pink - temporary survey markings.

21 (c) Red - electric power lines, cables, conduit, and lighting
22 cables.

23 (d) Yellow - gas, oil, steam, petroleum, or gaseous materials.

24 (e) Orange - communication, cable television, alarm or signal
25 lines, cables, or conduit.

26 (f) Blue - potable water.

27 (g) Purple - reclaimed water, irrigation, and slurry lines.

1 (h) Green - sewers and drain lines.

2 (3) A facility owner or facility operator shall provide
3 notification to the notification system using positive response.

4 (4) Upon receiving a notification during business hours from
5 an excavator through the notification system of previous marks
6 being covered or destroyed, a facility owner or facility operator
7 shall mark the location of a facility within 24 hours, excluding
8 all hours on nonbusiness days.

9 (5) If a facility owner or facility operator receives a
10 request under section 5(8) or (9), that facility owner or facility
11 operator shall provide additional assistance to an excavator within
12 3 hours of a request made by the excavator during business hours.
13 An excavator and a facility owner or facility operator may agree to
14 an extension of the time for additional assistance. If a request
15 for additional assistance is made at a time when the additional
16 assistance cannot be provided during normal business hours or
17 assistance is required at a remote rural location, the response
18 time shall be no later than 3 hours after the start of the next
19 business day or a time based on mutual agreement.

20 (6) If a facility owner or facility operator receives notice
21 that a facility has been damaged, that facility owner or facility
22 operator shall promptly dispatch personnel to the area.

23 (7) A facility owner or facility operator shall respond within
24 3 hours to an emergency notice, or before the start day and time
25 provided in an emergency notice if that start day and time is more
26 than 3 hours from the time of notice.

27 (8) New facilities built after the effective date of this act

1 shall be constructed in a manner that allows their detection when
2 in use.

3 (9) This section does not apply to the state transportation
4 department or to the marking of a county or intercounty drain by a
5 county drain commissioner's office or drainage board.

6 Sec. 8. This act does not limit the right of an excavator,
7 facility owner, or facility operator to seek legal relief and
8 recovery of actual damages incurred and equitable relief in a civil
9 action arising out of a violation of the requirements of this act,
10 or to enforce the provisions of this act, nor shall this act
11 determine the level of damages or injunctive relief in any such
12 civil action. This section does not affect or limit the
13 availability of any contractual or legal remedy that may be
14 available to an excavator, facility owner, or facility operator
15 arising under any contract to which they may be a party.

16 Sec. 9. (1) The notification system and its officers, agents,
17 or employees are not liable for any damages, including damages for
18 injuries or death to persons or damage to property, caused by its
19 acts or omissions in carrying out the provisions of this act. The
20 notification system is not responsible for assuring performance by
21 a facility owner or facility operator of its obligation to
22 participate in the notification system under section 4(4).

23 (2) Notwithstanding any other provision of this act, an
24 excavator or a farmer engaged in farming operations that complies
25 with this act is not responsible for damages that occur to a
26 facility that is improperly marked, not marked, or determined to be
27 within the safe zone.

1 (3) An owner of a farm who complies with this act is not
2 liable for any damages to a facility if the damage occurred in the
3 course of farming operations, except in those lands within the
4 public right-of-way, unless the owner intentionally damaged the
5 underground facility or acted with wanton disregard or recklessness
6 in damaging the facility. As used in this subsection, "owner"
7 includes a family member, employee, or tenant of the owner.

8 Sec. 10. This act does not authorize, affect, or impair local
9 ordinances, charters, or other provisions of law requiring permits
10 to be obtained before excavating or tunneling in a public street or
11 highway or to construct or demolish buildings or other structures
12 on private property. A permit issued by a governmental agency does
13 not relieve a person from the responsibility of complying with this
14 act. The failure of any person who has been granted a permit to
15 comply with this act does not impose any liability upon the
16 governmental agency issuing the permit.

17 Sec. 11. (1) A person who engages in any of the following
18 conduct is guilty of a misdemeanor punishable by imprisonment for
19 not more than 1 year or a fine of not more than \$5,000.00, or both:

20 (a) Knowingly damages an underground facility and fails to
21 promptly notify the facility owner or facility operator.

22 (b) Knowingly damages an underground facility and backfills
23 the excavation or otherwise acts to conceal the damage.

24 (c) Willfully removes or otherwise destroys stakes or other
25 physical markings used to mark the approximate location of
26 underground facilities unless that removal or destruction occurs
27 after the excavation or blasting is completed or as an expected

1 consequence of the excavation or blasting activity.

2 (2) Upon complaint filed with the commission or upon the
3 commission's own motion, following notice and hearing, a person,
4 other than a governmental agency, who violates any of the
5 provisions of this act may be ordered to pay a civil fine of not
6 more than \$5,000.00 for each violation. In addition to or as an
7 alternative to any fine, the commission may require the person to
8 obtain reasonable training to assure future compliance with this
9 act. Before filing a complaint under this subsection, a person
10 shall attempt to settle the dispute with the adverse party or
11 parties using any reasonable means of attempted resolution
12 acceptable to the involved parties. In determining the amount of
13 any fine, the commission shall consider all of the following:

14 (a) The ability of the person charged to pay or continue in
15 business.

16 (b) The nature, circumstances, and gravity of the violation.

17 (c) Good-faith efforts by the person charged to comply with
18 this act.

19 (d) The degree of culpability of the person charged and of the
20 complainant.

21 (e) The history of prior violations of the person charged.

22 (3) A commission determination under subsection (2) shall not
23 be used against a party in any action or proceeding before any
24 court. A complaint filed under subsection (2) does not limit a
25 person's right to bring a civil action to recover damages that
26 person incurred arising out of a violation of the requirements of
27 this act.

1 (4) The commission shall develop forms with instructions and
2 may promulgate administrative rules for processing complaints under
3 this act, pursuant to the administrative procedures act of 1969,
4 1969 PA 306, MCL 24.201 to 24.328.

5 Sec. 12. (1) Except as provided in this section, this act does
6 not affect the liability of a governmental agency for damages for
7 tort or the application of 1964 PA 170, MCL 691.1401 to 691.1419.

8 (2) A facility owner or a facility operator may file a
9 complaint with the commission seeking a civil fine and, if
10 applicable, damages from a governmental agency under this section
11 for any violation of this act.

12 (3) After notice and a hearing on a complaint under subsection
13 (2), the commission may order the following, as applicable:

14 (a) If the commission has not issued an order against the
15 governmental agency under this section within the preceding 12
16 months, a civil fine of not more than \$5,000.00. In determining the
17 amount of the fine, the commission shall consider the factors in
18 section 11(2).

19 (b) If the commission has issued an order under subdivision
20 (a) against the governmental agency within the preceding 12 months,
21 both of the following:

22 (i) A civil fine of not more than \$10,000.00. In determining
23 the amount of the fine, the commission shall consider the factors
24 in section 11(2).

25 (ii) That the governmental agency provide at its expense
26 underground facility safety training to all its personnel involved
27 in underground utility work or excavating.

1 (c) If the commission has issued an order under subdivision
2 (b) against the governmental agency within the preceding 12 months,
3 both of the following:

4 (i) A civil fine of not more than \$15,000.00. In determining
5 the amount of the fine, the commission shall consider the factors
6 in section 11(2).

7 (ii) If the violation of this act by the governmental agency
8 caused damage to the facilities of the facility owner or facility
9 operator, that the governmental agency pay to the owner or operator
10 the cost of repair of the facilities.

11 (4) A party to a complaint filed under this section or section
12 11 may file an appeal of a commission order issued under this
13 section or section 11 in the Ingham county circuit court.

14 (5) This section does not apply if the violation of this act
15 was a result of action taken in response to an emergency.

16 (6) A finding by the commission under this section is not
17 admissible in any other proceeding or action.

18 (7) A civil fine ordered under this act shall be paid to the
19 commission and used for underground facilities safety education and
20 training.

21 (8) Each day upon which a violation described in this act
22 occurs is a separate offense.

23 Sec. 13. An individual engaged in a farming operation on a
24 farm shall comply with this act beginning May 1, 2014.

25 Enacting section 1. 1974 PA 53, MCL 460.701 to 460.718, is
26 repealed.

27 Enacting section 2. This act does not take effect unless

1 Senate Bill No. 539 of
2 the 97th Legislature is enacted into law.
