**MOAHR assigned rule set number:**

2020-82 LR

**Title of proposed rule set:**

Pharmacy - Controlled Substances

**3. Purpose for the proposed rules and background:**

The purpose of the Pharmacy - Controlled Substances Rules is to regulate the schedules, licenses, security, records, dispensing and administering, prescriptions, distributions, and administrative and disciplinary procedures for controlled substances. The proposed rules will: clarify R 338.3135 and require physician's assistants to meet the opioid training requirements that apply to controlled substances licensees because they hold a controlled substance license; expand the individuals who must take the opioid training; require individuals to take the opioid training by July 1, 2022; exempt an individual licensed under section 7303 of the code, MCL 333.7303, who prescribes or dispenses controlled substances only for research on animals from taking the opioid training; clarify that R 338.3162b requires additional information to be submitted to the Prescription Drug Monitoring Program (MAPS) database; clarify rules regarding electronic transmission of prescriptions pursuant to section 17754a of the Public Health Code; update the controlled substances schedules; update rules related to the opioid crisis; clarify licensing provisions; evaluate the need for a separate license to treat a drug-dependent person; clarify when inventories and records are required; update prescription requirements; clarify dispensing and distribution requirements; and clarify refilling of prescriptions.

**4. Summary of proposed rules:**

The proposed revisions to the rules will: adopt the federal schedule of controlled substances; clarify when a controlled substance license is required; modify the requirements for opioids and other controlled substances training; modify the licensure requirements for prescribers who provide maintenance or detoxification treatment in the course of their professional practice or who are registered with the DEA to provide such treatment; clarify when a licensee may prescribe, dispense, and administer a controlled substance to a drug dependent individual; clarify “significant” loss; clarify when an inventory of controlled substances is required; modify record retention to two years for most records and 5 years for an original prescription; provide the requirements for electronic transmission of prescriptions; provide the process for a waiver from the mandate to electronically transmit a prescription; and modify reporting to the electronic system for monitoring.

**12. Identify any changes made to the proposed rules based on comments received during the public comment period:**

	<b>Name &amp; Organization</b>	<b>Comments made at public hearing</b>	<b>Written Comments</b>	<b>Agency Rationale for change</b>	<b>Rule number &amp; citation changed</b>
1	Novak/MSMS		Subrules (3) and (8) appear to be both duplicative and contradictory. For clarity purposes, MSMS suggests that activities requiring a separate controlled substance licenses be included in subrule (3), while exceptions to that requirement be addressed in subrule (8) and (9).	To provide clarity to the rule, activities requiring a separate controlled substance license, will be included in subrule (3), while exceptions to that requirement will be addressed in subrules (8) and (9). 			<p>License, so providers understand which license is being discussed.</p> <p>MSMS believes that the Department should eliminate proposed Rule 37. With the proposed elimination of the requirement to have a separate controlled substance license for prescribing, dispensing, or administering a controlled substance to a drug dependent person in a drug treatment and rehabilitation program under Rule 32, proposed Rule 37 is both moot and confusing. It is also duplicative of proposed Rule 63, which requires compliance with federal law to provide treatment to a “drug-dependent individual.”</p>	<p>is eliminated not waived.</p>

3	Baran		Other than the beginning inventory the rule does not state the annual inventory must be kept at the licensed location. Add to (5) "at the licensed location."	To add clarity, the phrase "at the licensed location" will be added to the rule.	R 338.3151 (5)
4	Baran		As voided DEA 222 forms must be kept at the licensed location pursuant to 21 CFR 1305.17, "or voided" should be added to the rule.	For consistency with federal regulations, the phrase "or voided" will be added to the rule.	R 338.3153 (a)
5	Eid/CVS Health		The term "sales receipt" be further defined to provide clarity and to explain whether sales receipts may be stored electronically or not.	To clarify, the phrase "in electronic or paper form" will be added to (c).	R 338.3153 (c)
6	Sapita/MPA		We feel that it is a cumbersome requirement to have our institutional pharmacists input their license number every time they check the machines. We would like to see the verbiage requiring the "license number" to be removed completely.	The requirement will be modified to "identification" instead of "name and license number."	R 338.3154 (5)(h)(vi)

7	Mankowski  Novak/MSMS Carlson/MHA		For consistency, align the rule with the Code and the Pharmacy General Rules which also addresses electronic transmission of prescriptions.	Effective Date/Subrules (1) and (3): The Public Health Code mandates electronic transmission of prescriptions as of October 1, 2021 but requires that the Department delay the implementation date of the mandate to the date established by the Federal Centers for Medicare and Medicaid Services for electronic transmission of prescription for controlled substances. Therefore, the effective/enforced date will be the date the mandate is enforced by the Federal Centers for Medicare and Medicaid Services. 11	Mollien		<p>The rules do not address or provide clarity for a definition of what a “cash” transaction is for purposes of reporting “the prescription payment type” under R 338.3162b(1)(q). The rule should add a definition or explain what payment types are considered “cash” under the ASAP 4.1 reporting requirements, which should include cash prices at U&amp;C and, only for purposes of reporting to MAPS, any discount card used that is not regulated under the Insurance Code (e.g., GoodRx, etc.)</p>	<p>The phrase “cash discount cards are considered cash transactions” will be added.</p>	<p>R 338.3162b(1)(q)</p>

Behavior allowed/Subrule (1): The rule will be modified to state the behavior that is allowed instead of what is prohibited. “Drug treatment and rehabilitation program”/Subrules (1)(b) and (3)(b): This term is not defined in the Code. It will be modified to “program” which is defined in the Mental Health Code, MCL 330.1260(1)(i). 13	Sapita/MPA		Regarding R338.3165 subsection 2(c) which specifies “dispensing pharmacist”. We believe this would cause undue hardship on our relief pharmacists who may work at different pharmacies each day. Would the dispensing relief pharmacist have to check each place of work to ensure compliance with this rule?	“Dispensing pharmacist” and “pharmacist” will be modified to “pharmacy.”	R 338.3165
