<u>TRANS. NO.</u>	<u>AGENCY</u>	<u>SUBJECT</u>
21-46	Department of Licensing And Regulatory Affairs- Firefighters Training Council	General Rules

**FISCAL IMPACT:**

The proposed rule change would have a negative fiscal impact on the Department of Licensing and Regulatory Affairs, specifically the Bureau of Fire Services. However, the required activities and changes likely would be accommodated within existing appropriations. Fireworks Safety Fees and other restricted funds allocated to the Bureau would be utilized to maintain a Certification Specialist position and develop and administer training exams. The approximate cost of an FTE is \$110,000. Exact estimates as to the cost of exam and training changes is not available at this time.

Local units of governments also would be expected to track continuing education requirements; however, this likely would not create any new significant cost burden, as departments already do so.
