After being license for over a decade as a cosmetologist and attending a barber academy, outside of the state of Michigan, I would like to voice that I strongly believe that the decision to no longer allow cosmetologist to use clippers, will have a vastly negative impact on the cosmetology and barber community as well as the economy within the entire state of Michigan. With the limited access to barber academy is in the state and the separation between barbering licenses and cosmetology licenses (that I understand very strongly, after being unable to transfer my barber license from another state) hundreds of businesses that employ cosmetologist to provide mens hair cutting services will be out of business, thousands of cosmetologist that specialize in men's hair cutting services will be out of a job without access to continuing education.

**Subject:** Please do not make the changes that would cause hardships for cosmetologist, hair dressers and barbers. With the rate of inflation people cannot afford to pay more for these services.
