

GenNET Student Testimonials

Ashley, Goodrich High School Student, Spanish II (BYU)

I took an online class because I couldn't take the class at my home school due to my schedule.

When I first got started with my class I was surprised because it wasn't that difficult and I went through the lessons quickly. Then toward the end it became more challenging.

Brittany, Goodrich High School, German, (BYU)

I took an online course because I was looking for something different. I liked that it was different. I could take something that I was interested in, even though it wasn't offered at [my]...high school.

[My mentor] made sure I kept my grades updated and signed me up for the class.

Adam, Goodrich High School, Astronomy, (BYU)

My online class taught me things I actually wanted to know. I was surprised by how hard it was to pace yourself.

Dan, Goodrich High School, US Foreign Policy & Marketing (BYU)

My options for senior classes were extremely limited, so I filled a gap in the schedule with an online class. I was surprised by how easy it actually was and that I could learn as much from independent study as a regular class...I enjoyed the freedom of working or not working on it as I chose.

Katie, Carman Ainsworth H.S. Child Development

I like that I can go at my own pace and work alone. I was surprised because it was a lot to read. My mentor helped me by [explaining] how the course worked.

Aisha, Carman Ainsworth H.S., Multicultural Literature

I took an online class to see other choices and opportunities...I would take another online course because the class I took was helpful and educational.

Tashween, Ali, Carman-Ainsworth, AP Art History (Florida Virtual School)

My mentor helped me by always checking to see how I was doing and if she needed to do anything for me. I was surprised by how much you learn when you take a class independently.

Emily, Goodrich H.S.

"It's good because the info is there all the time, I can study at home and it's easy to go at my own pace".

Ella, Goodrich H.S.

“I wanted a different experience than a traditional classroom. This gives you a lot more freedom and it teaches you about responsibility. My mentor helps to keep me going by making it fun. I think it helped me because the information is presented at more of a college level and it gives me a taste of what it’s going to be like when I go to college. I would do this again.”

Matthew, Goodrich H.S. Intro To Commercial Art

I took Intro. to Commercial Art as an elective. I had to create a portfolio and send it in and everything was included, postage and everything.”

Alyson, Fenton H.S., AP Biology (NW)

I was scheduled to dual enroll but when that plan fell through I decided to take an online course and wanted something challenging so I took AP Biology. I like to be able to learn at my own pace and with my own examples. It also helps me for the future by learning to teach myself and learn through textbooks. I was surprised by the freedom and discipline the class has. You have the freedom of how fast you want to take it and if you want to work on it at home or at school, but you also need discipline because there is structure and you can’t slack at all.

Lindsey, Fenton, H.S., Accounting 1 (BYU)

I took an online course because my high school courses that was taking wouldn’t allow me to take accounting at the high school due to conflicting schedules/hour periods during the day. I liked that it was easy to follow instructions and navigate the website. What surprised me is how you can pace yourself and make it convenient to your schedule. My mentor helped me become more familiar with the how to use the website and the process in general. I would take another online course because I learn what I am interested in and I can work on my own rate.

Tiffany, Fenton H.S., Character of America (BYU)

I would take another online course for the challenge.

Kirby, Fenton H.S., Intro to Theater Honors (NW)

My mentor was a big help, she served as a link between my instructor and me. She always made sure I knew my test scores and that I was staying on top of my work.

Dianna, Fenton H.S., Psychology, (Keystone)

This has been a beneficial experience that has forced me to practice self-discipline. Also, I will be more prepared for online college classes. Being able to work at my own [ace was really helpful to. I could focus on heavier material more and move quickly through the lighter topics.
