

Charter Township of Clinton

January 20, 2010

To Whom It May Concern,

The Election Process for those wishing to participate needs to be fair, non-partisan, accurate, and be economically feasible.

As a local Municipal Clerk representing a community of just under 100,000 people, we need a concise process that helps us in the election process.

We have a large contingency of Senior Citizens and many requests to exercise their right to vote as an absent voter. My office tries to fairly assist all voters by being able to process those that we know based on past practice request voting AV. We must be able to send applications to voters as necessary. It lets us better logistically serve our residents. Economically, we can better budget staff and save dollars when working through the election process. We have to be in compliance with many State Election Statutes and need HB5456 to help us assist our residents.

Please consider the language of the house bill as viable, advantageous and be able to service the people of the State of Michigan. Let's work for what will best serve our residents and those assisting them with the election process. We ask for your help to make our job easier and be more effective with the passage of HB5456.

Sincerely,

George Fitzgerald
