24 where practicable. The deactivation of these lights is the signal
25 for stopped traffic to proceed.

26 (b) If the pupils are required to cross the roadway, the
27 driver of a school bus equipped with red and amber alternately

1 flashing overhead lights in accordance with section 19 shall
2 activate the alternately flashing overhead amber lights not less
3 than 200 feet before the stop, stop the bus on the roadway or

20 flashing overhead red lights while receiving or discharging pupils.
21 Before resuming motion, the driver shall deactivate these lights
22 and allow congested traffic to disperse where practicable. The
23 deactivation of these lights is the signal for stopped traffic to
24 proceed.

25 (d) If the pupils are not required to cross the roadway, the
26 driver of a school bus equipped with red and amber alternately
27 flashing overhead lights in accordance with section 19 shall

10 proceed.

11 (e) If the pupils are not required to cross the roadway and
12 where the road has adequate width for the school bus to be pulled
13 to the far right of or off the roadway or private road allowing
14 traffic to flow and to provide for the safety of pupils being
15 boarded or discharged, the driver shall activate the hazard warning
16 lights before the stop and continue to display the lights until the
17 process of receiving or discharging passengers has been completed
18 if the lawful speed limit is ~~45~~50 miles per hour or less. Before
19 resuming motion, the driver shall deactivate these lights. The
20 driver of a school bus shall only use this procedure at stops where

24 shall use the appropriate procedure in subdivision (a), (b), (c),
25 or (d) as if pupils were not required to cross the roadway.

26 (f) Except as provided in subdivision (e), if the pupils are
27 not required to cross the roadway and where the school bus may be

1 pulled off the roadway or private road or where the road has
2 adequate width for the school bus to be pulled off to the far right
3 of the roadway or private road leaving the normal traffic flow
4 unobstructed and to provide for the safety of pupils being boarded
5 or discharged, the driver shall activate the hazard warning lights
6 before the stop and continue to display the lights until the
7 process of receiving or discharging passengers has been completed.
8 Before resuming motion, the driver shall deactivate these lights.
9 The driver of a school bus shall only use this procedure at stops
10 where the school administrator or entity under contract with a

17 and the stopped bus is not clearly and continuously visible to
18 approaching vehicles on that highway or roadway for at least 400
19 feet. When the distance from the stopped bus to the end of the
20 highway or roadway is less than 400 feet, clear and continuous
21 visibility must be available from the bus to the end of the highway
22 or roadway.

23 (b) If the lawful speed limit is 35 miles per hour or less and
24 the stopped bus is not clearly and continuously visible to
25 approaching vehicles on that highway or roadway, for at least 200

8 crossing procedures and the correct hand signal in the district, if
9 any. If a school uses school bus drivers for this instruction, the
10 state board may reimburse the school for this training.

11 (7) For the purpose of this section, "required to cross the
12 roadway" does not include crossing the roadway with the assistance
13 of a traffic control signal, or with the assistance of a school
14 crossing guard as defined in section 57b of the Michigan vehicle
15 code, 1949 PA 300, MCL 257.57b, and applies only to the roadway on
