

MICHIGAN SENATE

Senate Resolution No. 24

Offered by Senators Geiss, Anthony, Bayer, Chang, Cherry, Damoose, Irwin, Klinefelt, McCann, McMorrow, Moss, Polehanki, Santana, Shink and Wojno

A RESOLUTION TO COMMEMORATE APRIL 11-17, 2025, AS BLACK MATERNAL HEALTH WEEK

WHEREAS, According to the Centers for Disease Control (CDC), Black mothers in the United States (U.S.) die at two to three times the rate of white mothers; and

WHEREAS, The CDC data from 2023 for pregnancy-related deaths shows that maternal mortality rates are disproportionately high: 14.5 deaths per 100,000 live births for white women, 50.3 deaths per 100,000 live births for Black women, and 18.6 deaths per 100,000 live births for women of all races in the U.S.; and

WHEREAS, Among high-income nations, the U.S. has some of the worst rates of maternal and infant health outcomes, despite spending an estimated \$111 billion per year on maternal, prenatal, and newborn care; and

WHEREAS, At 14.8 percent, Black women have the highest percentage of U.S. live births that were preterm; and

WHEREAS, Disparities in maternal and infant mortality are rooted in structural racism. The Institute of Medicine reported substantial disparities in the quality of care for minority communities even when accounting for healthcare insurance coverage and income; and

WHEREAS, Black women are more likely to quit, be fired, or return to work before they are healthy after giving birth due to inadequate family and medical leave policies; and

WHEREAS, Black maternal death is one of the widest, but not the only racial disparities in women's health; and

WHEREAS, Black women are 22 percent more likely to die from heart disease than white women, 71 percent more likely to die from cervical cancer, and three to four times more likely to die from pregnancy-related or childbirth-related causes; and

WHEREAS, According to the National Institutes of Health, when compared with white women with the conditions of preeclampsia, eclampsia, abruptio placentae, placenta previa, and postpartum hemorrhage, which are common causes of maternal death and injury, Black women are three to four times more likely to die than white women who had the same condition; and

WHEREAS, Black women are more likely to experience reproductive health disorders such as fibroids, and are three times more likely to have endometriosis; and

WHEREAS, According to the Michigan Maternal Mortality Surveillance Project, between 2016 to 2020, Black women in Michigan experienced a pregnancy-related mortality rate of 36.5 deaths per 100,000 live births compared to 16.3 deaths per 100,000 live births for white women in Michigan; and

WHEREAS, According to the Commonwealth Fund, the U.S. has the highest maternal death rate in high income countries in which two-thirds of all recorded deaths are deemed to be preventable. Our state currently ranks 23rd in the nation for maternal deaths; and

WHEREAS, These alarming statistics for Black maternal health cut across socio-economic status, maternal age, and education levels; and

WHEREAS, We recognize the necessity for increased attention to the state for Black maternal healthcare as well as the need to study and understand the root causes of the discrepancies in maternal health outcomes; and

WHEREAS, We support community-driven programs, care solutions, the improvement of prenatal care and overall maternal healthcare, the improvement of breastfeeding rates and nutrition, and the amplification of the voices of Black mothers, women, families, and stakeholders, including Black women from across the diaspora and Afro-Latinx groups; and

WHEREAS, We also recognize the necessity to end maternal mortality statewide, nationally, and globally in order to strengthen the need for maternal health and maternal rights; now, therefore, be it

RESOLVED BY THE SENATE, That the members of this legislative body commemorate April 11-17, 2025, as Black Maternal Health Week.

Adopted by the Senate, April 16, 2025.

Secretary of the Senate
